MEMORANDUM FOR: Deputy Director of Central Intelligence

SUBJECT : Time Magazine Article on Intelligence

1. Strobe Talbott, diplomatic correspondent, and Bruce Nelan, Pentagon correspondent, for Time magazine, are collaborating on a major article on intelligence. It has been described to me as similar to the article which appeared in Time this week about the Defense Department and national security. The correspondents are scheduled to meet with the DCI at 2:00 p.m. on 2 June. They have also requested interviews with you (DDCI) and the DDI on the same day if possible. It is now expected that the article would be finished by 9 June and be on the streets on Monday, 13 June.

2. To accompany this article the picture editor has requested permission to have a Time photographer present at the interviews. In addition they wish to photograph the exterior of the CIA building and locations and activities within the building which we would select. They have agreed to abide by any restrictions we may place on the photo sessions, i.e., they would expect to have a security man with the photographer both while he is photographing and, if necessary, while he is developing his film. They will provide us with any negatives which we would reject on the grounds of security.

3. I need your approval and a time for the interview as soon as possible.

Herbert E. Hetu
Assistant to the Director
Public Affairs
